

What To Expect At The Showroom

Visiting one of our showrooms is the first step in your turning your dream kitchen into reality. We have a few suggestions to help make sure your first visit is successful and you leave with all the information you need.

1. Bringing a rough sketch with dimensions will allow us to prepare a more accurate quote. Using our Quick Quote Worksheet can help. The worksheet can be downloaded at www.countertopsSTL.com/quickquote.
2. Some of the most helpful items to bring are samples of other materials being used in your project. A cabinet door or drawer, paint, fabric, and flooring samples can be very helpful with choosing the perfect countertop color.
3. Take some photos of your project area as these can be helpful explaining your layout.
4. Bring your questions! We are here to provide the information and resources you'll need to make the right choices for you new countertops.
5. We can quickly prepare a quote for you before you leave.
6. Samples of our countertop colors are available for you to bring home to visualize the choices in your own environment.
